

# How to Subscribe to Signal Providers in MetaTrader

The "Signals" service in MetaTrader 4 and MetaTrader 5 allows you to subscribe to the trading signal providers of your choice. Once you have signed up for a trader's signal feed, your trading account will automatically copy each of their trades.

To Start Receiving Trading Signals in MetaTrader:

1. Open a [MetaTrader 4](#) or [MetaTrader 5](#) account if you haven't already done so (choose any live or demo MetaTrader account);
2. [Sign up for MQL5.community](#) in myAlpari;
3. Launch MetaTrader, go to "Tools" – "Options" in the main menu (or press "Ctrl+O") and select the "Community" tab. Enter your MQL5.community login and password;
4. Switch to the "Signals" tab in the lower "Terminal" block ("Ctrl+T") of MetaTrader. Double-click on the signal provider you would like to subscribe to;
5. Click the "Subscribe" button near the top of the signal provider's page. A confirmation window will appear;
6. In the confirmation window, check the box marked "Agree to the terms of use of the Signals service" and enter your MQL5.community password. The "Options" menu will appear with the "Signals" tab preselected;
7. In the "Signals" tab, choose the settings for how you would like trades from this signal provider to be copied.

Now you're ready. From this point on, all trades made by your selected signal provider will be automatically copied on your trading account.

Please be aware that you need a trading account connected to [MetaTrader 4](#) or [MetaTrader 5](#) in order to subscribe to signals.

To subscribe to paid signals from MQL5.community, you will need to have money on your MQL5.community account.
